<b>Place of job</b>	<b>National Center of Paediatrics and Paediatric Surgery for Surgery</b>
<b>Probation program</b>	<b>Organs transplantation is actual and an vital problem of Republic of Kazakhstan. In the structure of mortality congenital malformations and diseases of the hepatobiliary system leading to disability and deaths, occupy a leading position. Many patients today are in need of liver transplantation. Today operations on liver transportation are not performed in Kazakhstan. Therefore I would like to undertake an internship and training in central hospitals of South Korea to obtain experience on managing patients, preoperative preparation, perform operations, postoperative care, and also nursing and rehabilitation patient who came through the liver transplantation.</b>
